**Re:** Telecommunications Services and Equipment for Elections Expansion

---

The Information Technology department requests Commissioner's Court authorization to advertise a request for proposals to provide the county with equipment and services to complete the telecommunications infrastructure required for the Elections office expansion. The request is funded by the Elections office construction project.

The proposal will procure equipment and services to deliver and install the required switches, cable managers, cabling and install services necessary to implement the network expansion. The configuration services will be performed by the County IT team.
